Application/Limitation

The oil filtering systems of type MPS/MF are designed and tested according to IMO Resolution MEPC.107(49). Field of application is oily bilge water separation with maximum oil content at overboard discharge of 15 ppm.
Installation is not permitted in spaces subject to explosion hazard.

The oil filtering system is to be equipped with an IMO type approved oil content meter and helical pump of type Seepex BN or a pump with the same speed-delivery characteristic curve.
Refer to IMO Type Approval Certificates specified in the Appendix of this certificate.
