DNV·GL

Certificate No:
TAA00000SA

TYPE APPROVAL CERTIFICATE

This is to certify:

That the Electrical Measuring and Protection Relay

with type designation(s)
SPR-P05/-P06I/-P06V/-P06DI/-P06VL/-P06IL

Issued to
Meiyo Electric Co. Ltd.
Shizuoka City, Shizuoka, Japan

is found to comply with
DNV GL rules for classification – Ships, offshore units, and high speed and light craft

Application :

Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.

Location classes:

Temperature	**A**
Humidity	**B**
Vibration	**B**
EMC	**A**
Enclosure	**B**

This Certificate is valid until **2021-10-16**.

Issued at **Høvik** on **2016-09-23**

for **DNV GL**

DNV GL local station: **Yokohama**

Approval Engineer: **Nils Jarem**

Odd Magne Nesvåg
Head of Section

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid.
The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Certificate No: **TAA00000SA**

Product description

Analog Speed Relay with following six type designations: SPR-P05/-P06I/-P06V/-P06DI/-P06VL/-P06IL.

Pulse Frequency Input
Output: 4..20mA (I-types); 0..10V (V-types)

Relay outputs for:
- Low speed
- Running speed
- Rated Speed
- Overspeed
- Sensor abnormal
- Low speed (types IL and VL only)

Response time for overspeed: <0.7s
Detecting accuracy: +/-1% at full scale
Power supply: 24VDC

Approval conditions

The Type Approval covers hardware listed under Product description. When the hardware is used in applications to be classed by DNV GL, documentation for the actual application is to be submitted for approval by the manufacturer of the application system in each case. Reference is made to DNV GL rules for classification of ships Pt.4 Ch.9 Control and monitoring systems.

Application/Limitation

Suitability to be evaluated for the individual engine type. Sensor abnormal output to be configured according to closed circuit principle.

Type Approval documentation

Tests carried out

Applicable tests according to Standard for Certification No. 2.4, April 2006.
Guidelines for the Performance of Type Approvals Part 2, Edition 2003

Marking of product

The products to be marked with:
- manufacturer name
- model name
- serial number
- power supply ratings

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Periodical assessment is to be performed at least every second year and at renewal of this certificate.
