

TYPE APPROVAL CERTIFICATE

This is to certify:**That the RPM sensor**

with type designation(s)

Digital tach sensor/ Incremental encoder HOG 11/11G, Encoder MHGX xxx xx xxxx

Issued to

**Baumer Hübner GmbH
BERLIN, Germany**

is found to comply with

DNV GL rules for classification – Ships, offshore units, and high speed and light craft**Application :****Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.**

Type	Temperature	Humidity	Vibration	EMC	Enclosure
Encoder HOG 11/11G	D	B	B	B	C
Encoder MHGX xxx xx xxxx					

This Certificate is valid until **2021-11-30**.Issued at **Hamburg** on **2016-12-01**for **DNV GL**DNV GL local station: **Magdeburg**Approval Engineer: **Didier Girardin**

**Duy Nam Le
Head of Section**

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Job Id:
Certificate No: **TAA00000WS**

Product description

Designation	Type
Optical Incremental encoder	HOG 11 HOG11G (Twin encoder)
Magnetic rotary encoder ²⁾	MHGX xxx xx xxxx ¹⁾

¹⁾ "X" is an placeholder for variable configurations of the same product. For example, wheel size, magnetic pole width wheel fixing and bore diameter.

²⁾ Rotary encoder for detection of speed and position of shafts (Sensor head and wheel)

Application/Limitation

The Type Approval covers hardware listed under Product description. When the hardware is used in applications to be classed by DNV GL, documentation for the actual application is to be submitted for approval by the manufacturer of the application system in each case by inclusion in an instrument list. Reference is made to DNV GL Rules for Ships Pt.4 Ch.9 Control and Monitoring System.

Tests carried out

Applicable tests according to DNV Standard for Certification No. 2.4, April 2006.

Marking of product

The products to be marked with:

- Type name
- Manufacturer name
- Serial number

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Periodical assessment is to be performed at least every second year and at renewal of this certificate.
