

TYPE APPROVAL CERTIFICATE

This is to certify:**That the Loading Computer System**with type designation(s)
LOADPLUS Ver.1.0.5

Issued to

**Hanla IMS Co., Ltd.
Busan, Republic of Korea**is found to comply with
DNV GL rules for classification – Ships and offshore units**Application :****Type approved for calculation and control of loading conditions with respect to requirements for:**

- Check of shear force and bending moments against limit curves
- Check of intact stability, damage stability and grain stability by direct calculation
- Check of intact and damage stability against limit curve

Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.**Blank Control of Shear Force and Bending Moments against Limit Curve* Intact, Damage and Grain Stability**Issued at **Høvik** on **2018-12-20**This Certificate is valid until **2023-12-31**.for **DNV GL**DNV GL local station: **Busan**Approval Engineer: **Nils Heimvik**

**Inge Seglem
Head of Section**

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Product description

Available Options of the Software:

Based on the stored characteristic data and stored **3D** model and loading data given by the user, the following functions are performed onboard monohull vessels:

Hull Strength:

For prepared loading conditions;

1. Calculation of still water bending moment and shear force, and control against limit values.
2. Correction of still water shear force for bulk carriers.
3. Check of longitudinal strength of the hull girder for flooded cargo holds (previous IACS UR S17).

Stability:

For prepared loading conditions;

1. Calculation of draft, trim, righting levers (GZ) and metacentric height (GM)
2. Calculation and check of the intact stability criteria of 2008 IS Code Part A Ch.2.2 and 2.3
3. Calculation and check according to the damage stability criteria of MARPOL 73/78 Annex I Regulation 28, IMO IBC Code Ch.2, and IMO IGC Code Ch.2
4. Calculation and check according to the damage stability criteria IMO Res. MSC.235(82) as amended by MSC.335(90), Ch. 3, and SPS Code Res.A.534(13) Ch.2
5. Calculation and check of compliance with pre-stored limit curves for intact and damage stability
6. Calculation and check of the grain stability requirements of SOLAS-74 Reg. VI/Part C and MSC 23(59), (International Grain Code) including A.10.3

Approval conditions

1. The loading computer is considered as supplementary to the approved stability booklet and/or loading manual onboard.
2. Specific approval and certification is required for each vessel at which the program is installed. Documentation to be submitted for approval is listed in DNV GL Rules for Ships Pt.6 Ch.4 Sec. 7. The identification of software will be recorded in the certificate.
3. The program is either to be installed on one approved hardware (type approved or case-by-case approved), or it is to be installed on two nominated computers. If two nominated computers are available, approval of hardware may be waived (Ref. DNV GL Rules Pt.6 Ch.4 Sec.7).

Type Approval documentation

The type approval was initially carried out based on documentation submitted in connection with the actual approval of the following test vessels:

DNV GL Id.28971, SHINAN Heavy Ind. H1002, Strength and Stability
DNV GL Id.26921 SHANGHAI Shipyard & CHENGXI Shipyard , Strength and Stability

Job Id: **262.1-018456-3**
Certificate No: **TAA0000257**

DNV GL Id.30080 Zhejiang Chenye Shipb. Co.ltd CH0801 Damage stability
DNV GL Id.31872 Sudong Shipbuilding&Marine Eng.Co Ltd, S7001 Damage stability

Limitation

The type approval is valid only for the calculation results. I.e. the type approval is a confirmation that the software is able to give correct results provided that the stored characteristic data of the vessel and the user's input is correct.

Renewal assessment

The scope of the retention/renewal assessment is to verify that the conditions stipulated for the type approval is complied with and that no alterations are made to the product or software design.

The main elements of the assessment to be dealt with:

- Ensure that documentation for the type approval is available.
- Ensure that the type approved software complies with the referenced documents and specifications.
- Review of possible changes in design and performance of the type approved software version.
- Ensure traceability between manufacturer's product marking and the DNV GL Type Approval Certificate.

The assessment is to be performed only upon renewal, and by the unit issuing the type approval certificate.
