

TYPE APPROVAL CERTIFICATE

This is to certify:**That the Solenoid Valve**with type designation(s)
Solenoid valves with 2E85 type solenoid

Issued to

Eugen Seitz AG
Wetzikon, ZH, Switzerlandis found to comply with
DNV GL rules for classification – Ships, offshore units, and high speed and light craft**Application :****Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.**

Temperature	B
Humidity	B
Vibration	B
EMC	N/A
Enclosure	B

Issued at **Hamburg** on **2019-11-26**This Certificate is valid until **2024-11-25**.DNV GL local station: **Augsburg**for **DNV GL**Approval Engineer: **Didier Girardin**

Joannis Papanuskas
Head of Section

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Product description

Solenoid valves with 2E85 type solenoid:
1557 /41 Valve, direct acting ND 1.8 NC
1557 oH /41 Valve, direct acting ND 1.8 NC
2491 /41 Valve, direct acting ND 1.8 NC
2340 /41 Valve, direct acting ND 1.8 NO
2489 /41 Valve, pilot controlled ND 10 NC
2390 /41 Valve, pilot controlled ND 10 NC
2E85 Solenoid

Application/Limitation

The Type Approval covers hardware listed under Product description. When the hardware is used in applications to be classed by DNV GL, documentation for the actual application is to be submitted for approval by the manufacturer of the application system in each case.

The suitability for use in the respective application system has to be evaluated based on the requirements for Piping Systems DNV GL Pt.4, Ch.6

Cable connectors used for marine application shall have flame retardant properties in accordance with UL94 5VA, 5VB, V0 or V1. Alternatively glow wire test @960°C according to IEC 60695-2-11 may be accepted for the connectors.

Type Approval documentation

Hidden

Tests carried out

Applicable tests according to class guideline DNVGL-CG-0339, November 2016.

Marking of product

The products to be marked with:

- manufacturer name
- model name
- serial number

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Periodical assessment is to be performed after 2 years and after 3.5 years. A renewal assessment will be performed at renewal of the certificate.
