

Certificate No:  
**TAA000035X**

# TYPE APPROVAL CERTIFICATE

**This is to certify:**

**That the Monitoring Unit**

with type designation(s)  
**BW-MU/BW-MU Ex**

Issued to

**Weifang Baway Fluid Technology Co., Ltd.**  
**Weifang, China**

is found to comply with

**DNV rules for classification – Ships, offshore units, and high speed and light craft**

## Application :

**Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV.**

|                    |                 |
|--------------------|-----------------|
| <b>Temperature</b> | <b>A</b>        |
| <b>Humidity</b>    | <b>B</b>        |
| <b>Vibration</b>   | <b>A</b>        |
| <b>EMC</b>         | <b>B</b>        |
| <b>Enclosure</b>   | <b>B (IP56)</b> |

Issued at **Hamburg** on **2022-07-04**

This Certificate is valid until **2027-07-03**.

DNV local station: **Qingdao NB & CMC**

Approval Engineer: **Dariusz Lesniewski**

for **DNV**

.....  
**Joannis Papanuskas**  
**Head of Section**

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid.  
The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

LEGAL DISCLAIMER: Unless otherwise stated in the applicable contract with the holder of this document, or following from mandatory law, the liability of DNV AS, its parent companies and their subsidiaries as well as their officers, directors and employees ("DNV") arising from or in connection with the services rendered for the purpose of the issuance of this document or reliance thereon, whether in contract or in tort (including negligence), shall be limited to direct losses and under any circumstance be limited to 300,000 USD.

## Product description

Monitoring unit for measurement of total residual oxidant (TRO) and salinity of the ballast water.

| Instrument             | TRO Meter             | Salinity Meter |
|------------------------|-----------------------|----------------|
| Measuring Range        | 0.0 - 10.00 mg/L      | 0.0-70.00 PSU  |
| Accuracy               | ±10%                  | ±10%           |
| Resolution             | 0.01 mg/L             | 0.001 PSU      |
| Communication Protocol | Modbus RTU/RS485      |                |
| Drain flow             | 200 – 400 ml / minute |                |
| Rated input voltage    | AC100/220 V, 50/60 Hz |                |

### Main components:

|                                           |
|-------------------------------------------|
| Metallic cabinet (upper and lower part)   |
| Detection & Control PCB                   |
| Detecting chamber                         |
| Sensor of salinity meter                  |
| Smartpurge EXPO SP2-PM-ss (only BW-MU Ex) |
| Key & Screen                              |

Software version: V4.4.3

## Approval conditions

The following documentation of the actual application is to be submitted for approval in each case:

- Reference to this Type Approval Certificate
- System block diagram
- Power supply arrangement (may be part of the System block diagram)

The Type Approval covers hardware and software listed under Product description.

As long as the units are covered by the Type Approval, a product certificate according to Pt.4 Ch.9 Sec.1 will not be required. Correct configuration and set up for each delivery to be tested during commissioning after installation.

### Software control

All changes in software are to be recorded as long as the system is in use on board. Documentation of major changes is to be forwarded to DNV for evaluation and approval before implemented on board. Certification of modified functionality may be required for the particular vessel.

## Type Approval documentation

### Tests carried out

Applicable tests according to class guideline DNV-CG-0339, August 2021.

### Marking of product

The products to be marked with:

- manufacturer name
- model name
- serial number
- power supply ratings

### Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Job Id: **262.1-035572-1**  
Certificate No: **TAA000035X**

Periodical assessment is to be performed after 2 years and after 3.5 years. A renewal assessment will be performed at renewal of the certificate.
