Product description

P01 Dyopox Shop Primer; two component polyamide cured epoxy primer containing zinc phosphate

Application/Limitation

The approval test does not include any examination of possible effects of welding with this primer on the welder's state of health.

This approval verifies only that the shopprimer tested has no detrimental effect on the finished weld, it is presumed that the film thickness applied is in accordance with the manufacturer's recommendation.

The shop primer is approved for application on blast cleaned steel plates and sections.

Type Approval documentation

Tests carried out

Type Testing carried out according to **Type Approval documentation**, ref. DNV GL Report No. 2019-5258 from 2019-09-18 with the following result:

- Mean pore area 0 % (max. allowed pore area 15 %)

Marking of product

Product shall be marked with *manufacturer's name* and *address* and *type designation*; **P01 Dyopox Shop Primer**.

The marking is to be carried out in such a way that it is visible, legible and indelible. The marking of product is to enable traceability to the DNV GL Type Approval Certificate.

Periodical assessment

The scope of the Periodical assessment is to verify that the conditions stipulated for the Type Approval is complied with and that no alterations are made to the product design or choice of materials.

Periodical assessments (for Certificate Retention and Certificate Renewal) shall be performed according to DNVGL-CP-0338.

This certificate is only valid if required Periodical assessments are carried out with satisfactory results. To check the validity of this certificate, please look it up in <https://approvalfinder.dnvgl.com>.
