Job Id: **262.1-016877-2**  
Certificate No: **TAM00000UJ**

## Product description

Pinions for Thruster Steering

## Application/Limitation

| Gearbox unit | Gear module | Gearmesh | Max pinion torque (relief valve setting) [kNm] | Max continuous pinion torque [kNm] | Max dynamic pinion torque (auto pilot) [kNm] |
|--------------|-------------|----------|------------------------------------------------|------------------------------------|----------------------------------------------|
| RE 810 FS    | 10          | 15/99    | 8,33                                           | 5,56                               | 1,39                                         |
| RE 810 FS    | 10          | 15/99    | 9,40                                           | 6,54                               | 1,45                                         |

## Type Approval documentation

### Marking of product

The product to be marked with manufacturer's name or trademark and type number identification

### Periodical assessment

For retention of the Type Approval, a DNV GL surveyor shall perform an assessment after 2 years and after 3.5 years to verify that the conditions of the type approval are complied with. A renewal assessment will be performed at renewal of the certificate.

The objective of the Periodical Assessment is to verify that the conditions for the Type Approval are not altered since the Type Approval Certificate was issued. The main scope of the Periodical Assessment will normally include:

- Verification of the Type Approval applicant's production and quality system w.r.t. ensuring continued consistent production of the Type Approved products at the Type Approval applicant's own premises and at other companies that are given the responsibility for manufacturing of the products.
- Review of the Type Approval documentation and that this is still used as basis for the production
- Review of possible changes to the design, the material and the performance of the product
- Verification of the product marking.

In cases where the Type Approved product is manufactured at other companies, the Periodical Assessment shall verify that the Type Approval applicant has a quality control system for consistent production at their licensees/subcontractors. Furthermore Periodical Assessment shall be carried out randomly at these companies.

When a Type Approved product is manufactured at other companies, the Type Approval applicant takes the sole responsibility for the conformity of the product to the applicable requirements.

### Other Conditions

Slewing ring is included for information only in this certificate and shall be submitted for approval for each installation with relevant gear data sheet for gear calculation.
