Product description

Safety Stacker

Application/Limitation

Load	Shear [kN]
Test Load	263
Breaking Load	420

Tests to be carried out:

- Production testing: At least 2% of the items delivered are to be selected and subjected to the test load.
- Material tests are to be included energy testing at 0°C, with the impact energy requirements acc. to DNVGL-CP-0068. The material shall be according to the approved drawings. Material certificates shall be 3.1 acc. to ISO 10474:2013. The Cargo Securing Devices are intended for the use in cargo holds only.

Type Approval documentation

Drawing No.	Rev.	Title
K-E1-14C	S	Safety Stacker

Tests carried out

The prototype test was carried out in Kunshan, P.R. China, dated 2018-09-18 in accordance with the DNVGL-CP-0068.

Marking of product

Each item shall be marked by manufacturer for traceability.

Periodical Assessment

For retention of the Type Approval, a DNVGL surveyor shall perform a survey after 2 and 3.5 years, to verify that the Type Approval is complied with.
